title: "Bundle 1 (sanitized)" bundle\_index: 1

---

# Bundle 1 — Dual Track Execution Board & System Foundation (Sanitized)

---

This bundle contains the foundational architecture for LuminAI Genesis, including TGCR framework, resonance engine, and system surfaces.

## Purpose

---

- Define the resonance architecture: TGCR (Context  $\times$  State  $\times$  Input), Witness Protocol (W multiplier), Sixteen Frequencies.
- Specify system surfaces: Web UI (Next.js), CLI (Typer), Platform Hub (FastAPI).
- Establish repository layout and engineering rigor.

## Key References

---

- **TGCR Framework:** Triple-product resonance calculus ( $R = \text{Context} \times \text{State} \times \text{Input}$ ), effective resonance  $R' = R \cdot W$ .
- **Witness Protocol:** Governance multiplier ensuring safety as non-abandonment.
- **Sixteen Frequencies:** Affective eigenmodes for persona responses and safety gating.
- **System Surfaces:**
  - Web UI: Next.js chat with real-time resonance meter
  - CLI: Typer-based orchestration

- Platform Hub: FastAPI ( `/api/chat` , `/api/resonance` , `/api/session/{id}` , `/api/personas/activate` , `/api/status` )

## Repository Layout

---

```
luminai-genesis/  
├─ backend/          # FastAPI platform hub  
├─ ui/               # Next.js application  
├─ cli/              # Typer CLI  
├─ resonance/        # TGCR, witness, frequencies, engine  
├─ governance/       # Conscience axioms, witness protocol spec  
├─ docs/             # Architecture, personas, glossary, API  
├─ scripts/          # Bootstrap and dev helpers  
└─ .github/          # Workflows and templates
```

## Sanitization Note

---

Original bundle (11,152 lines) contained detailed execution board transcripts, conversational logs, and uploaded artifacts. These have been replaced with this sanitized summary. For canonical specs, see:

- `docs/GEOMETRY_OF_CONSCIENCE.md` (TGCR mathematics)
- `docs/ARCHITECTURE.md` (system design patterns)
- `backend/` (operational API implementation)

---

End of sanitized bundle 01.
