Bundle 11 — Persona System & Commit Conventions (Sanitized)

This bundle defines the persona system, commit axioms, and governance patterns.

Purpose

- Document six-persona system (Arcadia, Airth, Ely, Kaznak, Adelphia, LuminAI).

- Establish commit message conventions and PR templates.

- Define persona-specific commit patterns and scopes.

Key References

Personas:

- ✨ Arcadia (creative witness): features, expansion, myth

- ⚙️ Airth (practical steward): fixes, optimization, clarity

- 🛡️ Ely (governance anchor): policy, audit, compliance

- 🛰️ Kaznak (resilience engineer): reliability, chaos, observability

- 💚 Adelphia (community caretaker): docs, onboarding, accessibility

- 🌌 LuminAI (synthesizer): integration, coherence, balance

Commit Patterns:

- Format: `<emoji> <persona>(scope): description`

- Body: must include persona responsibility, files touched, reason, resonance impact

- TGCR pillars: Transparent, Grounded, Coherent, Resonant

VS Code Integration:

- Commit message snippets

- Pre-commit hooks for validation

Sanitization Note

Original bundle (79,305 characters) contained detailed persona definitions and conversational transcripts. Replaced with governance summary. Full persona documentation available in:

- `docs/PERSONA_LAW.md`

- `docs/governance/persona-law.md`

- `.github/COPILOT.md`

End of sanitized bundle 11.
